# HARI VIGNESHWARAN

## FRONT-END DEVELOPER (UNDER GRADUATE)

## ABOUT

A Young student who's looking for internships under my domains data science, machine learning, app and website project development to learn about the industry and to develop my skills.
I wish to learn and gather experience on various domains like Artificial Intelligence, Data Science, Machine Learning and Blockchain.

## PROJECTS

### Amazon Product Review Sentiment Analysis

It is a DataScience project developed using Python in Jupyter notebook. Here I Analysed the Amazon Products in their store using Sentiment Analysis to find the most inferior and the superior product in their Catalog.
*Source Code*

### Titanic Death Analysis

This is a DataScience project developed using Python in Jupyter notebook. In this project I have analysed the number of deaths happened in the Titanic accident, and I have used data visualisation to visualise it.
*Source Code*

### Netflix Movies and Shows Analysis

It is a DataScience project developed using Python in Jovian.ai. Here I analysed Movies vs Shows in Netflix and I visualised it using Matplotlib and Seaborn in a JupyterNoteBook.
*Source Code*

## EDUCATION

**2020- Present**
*Pursuing 3rd year in B.Tech Artificial intelligence and data science in Easwari Engineering College.
(Current CGPA : 8.33)*

**2019-2020**
*Completed HSC in Chinmaya Vidyalaya Higher Secondary School.*
